CONCEPT OF SELF CARE

- Self-care is
- "the set of activities in which one engages throughout life on a daily basis."
- Activities that encompass "a person's attempts to promote optimal health, prevent illness, detect symptoms at an early date, and manage chronic illness"
- A persons willful effort to health

Dr Shonima Govindan

- Carageenans
- Carageenans are a group of brominated compounds of linear polyunsaturated chains with multiple hydroxyl groups attached to the main chain.
- These properties allow carageenans to disperse in water, form highly viscous solutions and various gels over a wide pH range.
- Food applications for carageenans (K, DG) including animal feeds, dietary supplements, salad dressings, bakery fillings, ice cream, dietary desserts and animal feed blocks.
- Industrial applications for modified versions of carageenans are equally diverse. These are used as the thickening agents for chocolate, beer, wine and drinks, although less commonly than pectinates.
- From a human health perspective, it has been reported that carageenans have anti-carcinoma and antitumor properties.

Happiness does not depend
on what you have or who
you are, it solely relies on
what you think.
- Buddha

ഹപ്പിനസ്സ്, അനുഭവിക്കുന്നവർക്ക്
അത്ഭുതപ്പെടേണ്ട ഒന്നല്ല. അത്
അവർക്ക് ഉള്ള മനസ്സിലാണ്.

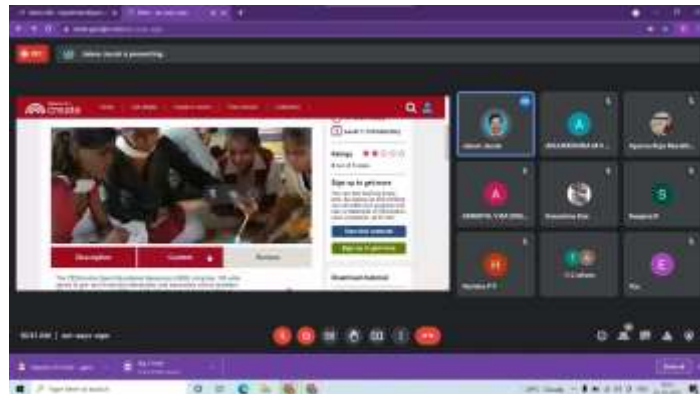

Happiness, according to the Indian
does not lie outside a person but is within
that person. It is the way nature of life.

DEFINITION IS A PROCESS

- Happiness can be thought of as an emotional state that reflects a high level of mental and/or emotional well-being.
- Scientific perspectives typically frame happiness as a complex binary construct that encompasses subjective elements of both affect and cognition that contribute to the overall experience.

P. G Department of English
